

DEVESH KOLTE

Bangalore, India | +91 75583 82201 | deveshkolte@gmail.com | [LinkedIn](#) | [GitHub](#)

EDUCATION

Nitte Meenakshi Institute of Technology (NMIT), Bangalore — B.Tech, Computer Science Engineering
Expected Graduation: 2029 | CGPA: 7.41 / 10

PROFILE

First-year CS student who shipped 3 AI-powered products in year one — a mobile app (APK), a web app, and a Chrome extension — all deployed and public. Builds end-to-end using AI orchestration: ideation, LLM integration, full-stack development, and deployment. Focused on solving real problems with zero budget.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C (academic)

Web & Mobile: Next.js, Tailwind CSS, React Native, Expo

AI & LLMs: LLM Integration, Prompt Engineering, OpenRouter, Groq

Automation: n8n, Workflow Automation

Tools & Deployment: Git, GitHub, REST APIs, Chrome Extension (Manifest V3), Vercel, EAS

PROJECTS

FareSnap — Flagship Project | github.com/deveshkolte/FareSnap

Cross-platform mobile app that compares fares across 9 Indian cab services — Uber, Ola, Rapido, Namma Yatri, BluSmart, inDrive, Bharat Cab, Savaari, Meru — instantly on one screen.

- AI-powered fare insights with surge pricing detection and recommendations on when prices will drop
- Highlights cheapest and best option with savings badge; GPS city auto-detection across 9 Indian cities
- Custom address autocomplete (no paid APIs), road distance + ETA via OSRM, one-tap deep links into each app
- Shipped as a real APK via EAS with onboarding flow on first launch

Stack: React Native, Expo, TypeScript, Groq (llama-3.1-8b-instant), Photon API, OSRM

tweet4D | tweet4-d.vercel.app | [GitHub](#)

AI web app for growing on X/Twitter built for the AI and tech niche.

- Generates tweets (5 variations), replies, threads, and reply-backs with algorithm-aware scoring (0–100)
- Persona settings, viral hook patterns, account analyzer, growth plan generator, best posting time by timezone
- Free model picker — no locked-in cost for the user

Stack: Next.js, TypeScript, Tailwind CSS, OpenRouter

Prompt Enhancer | [GitHub](#)

Chrome extension that transforms rough prompts into structured prompts directly inside ChatGPT, Claude, Gemini, and other AI platforms.

- Applies role, objective, format, constraints, and a self-critique loop in one click — same model, better output
- Free, no account required; built on research from 1,500+ papers and insights from leading AI researchers

Stack: Vanilla JavaScript, Chrome Manifest V3, OpenRouter API

Outfit AI (In Progress)

AI platform providing personalized outfit recommendations based on budget, occasion, skin type, age, and weight.

YouTube-to-Telegram Automation Bot (In Progress)

n8n automation pipeline that fetches transcripts from any YouTube video and delivers them directly to a Telegram bot.

Stack: n8n

BUILDER TRACK RECORD

- 3 shipped products in year one of college — 1 mobile APK, 1 web app, 1 Chrome extension — all deployed and public
- Building in public on X (Twitter), LinkedIn, and GitHub
- Entire stack built on free and open-source tools only — zero budget, zero exceptions
